

PUBLIC PERFORMANCE LICENSE

Music and words - the songs that spring from their union - remain historically one of the ultimate ways of expression for all civilizations.

At the same time, businesses of all kinds reinforce their cultural imprint and interaction with their clients, via the public performance of music works.

All respective companies that make use of music while operating for the public, are obliged by law to secure the appropriate license.

The fee that has to be paid for the use of music by each business entity, with respect to our represented repertoire, is defined according to the ORFIUM Music Rights Greece tariff table, in a simple, comprehensible and objective manner.

For the shaping of the tariff table, factors related to the following are co-evaluated:

- The location of the business entity
- Its capacity
- The type of business
- Means that are used for the public performance of music
- The benefits that the business entity enjoys, due to the public performance of music

ORFIUM Music Rights Greece applies cutting-edge tech tools that are being developed in Greece by its parent company (ORFIUM), which has been awarded as the "StartUp Of The Year" by the Elevate Greece initiative.

Due to these technological infrastructures and tools, ORFIUM Music Rights Greece can identify and match the repertoire used by each enterprise, in relation to our represented repertoire. At the same time, the use of technology allows limiting operating costs, thus the final amount paid to the beneficiaries of copyrights end up being larger and distributed with absolute transparency.

TARIFF TABLE ORFIUM MUSIC RIGHTS GREECE 2022 – URBAN AREAS, TOURIST AREAS & ISLANDS
Venues where the music is an auxiliary element for their operation
